EDUCATION

Vellore Institute of Technology, Bhopal
B.Tech in Computer Science and Engineering

Sep 2023 – Present
CGPA: 8.40 / 10.0

TECHNICAL SKILLS

AI / ML	LLM APIs (Groq, OpenAI, Gemini), Prompt Engineering, LLMs, RAG, LangChain, LangGraph, Model Deployment, Agentic Workflows (Function Calling, Tool Use), AI Output Evaluation
Languages	Java, Python, JavaScript
Backend	FastAPI, Node.js, Express.js, REST APIs
Frontend	React.js, HTML, CSS, Tailwind CSS
Tools	Git, GitHub

EXPERIENCE

Software Engineering Intern | Scramble Labs Technology Pvt. Ltd.

May 2025 – Aug 2025

- Developed backend APIs using **Python and Django**.
- Worked with **PostgreSQL** for database-related tasks.
- Used **Git** for code management and team collaboration.
- Built frontend components using **React.js and TypeScript**.
- Helped improve the **performance and loading speed** of the application.

PROJECTS

Multi-Agent Research Assistant

[GitHub](#)

LangGraph, Streamlit, Groq, Tavily, Python

- Architected a multi-agent research assistant using LangGraph state machines with 5 specialized nodes including Router, Researcher, Orchestrator, Worker, and Reducer, enabling autonomous web research and information synthesis.
- Developed a 3-mode research pipeline (Closed Book, Hybrid, and Open Book) using Tavily Search API to search multiple sources and generate fact-based, citation-backed answers.
- Launched a stateless Streamlit application on Community Cloud using Groq API, featuring live graph execution streaming, real-time node progress tracking, and one-click Markdown export.

FiTFEAST – Multi-Agent AI Indian Meal Recommendation System

[GitHub](#)

LangGraph, Groq API, Flask, Python

- Architected a 4-agent LangGraph workflow (Medical Analyzer, Nutritionist, Meal Generator, Validator) with a 2-iteration validation loop, enabling autonomous reasoning for personalized 7-day Indian meal plans.
- Leveraged Groq/compound, prompt engineering, and PyPDF to analyze medical reports, enforce clinical constraints and allergen safety, and generate medically-aware meal recommendations.
- Built a Flask + Server-Sent Events (SSE) application with an HTML, Tailwind CSS, and JavaScript frontend, and deployed using Gunicorn for production-ready scalability.

AI Resume Chatbot

[GitHub](#)

Python, FastAPI, Groq API

- Built a full-stack AI chatbot that lets recruiters upload resumes (PDF/DOCX) and ask questions about candidates in natural language.
- Integrated Groq LLM API with real-time SSE streaming for instant, token-by-token AI responses.
- Engineered a strict system prompt to ground AI answers exclusively to resume content, eliminating hallucination.
- Developed document parsing logic using PyPDF and python-docx to extract text from uploaded files.
- Designed a responsive frontend with drag-and-drop upload and a live chat interface.

ACHIEVEMENTS & LEADERSHIP

- Community Leadership** — Core Member of the Notion Community at VIT Bhopal; organized tech talks and peer learning workshops.
- Media Recognition** — Featured in local newspaper for scoring 98.6% in Class 10 boards, ranking in the top 3 in the district.
