EDUCATION

B.Tech in Computer Science and Engineering — VIT Bhopal University (CGPA: 8.40 / 10.0)

Sep 2023 – Present

SKILLS

Languages:	Java, JavaScript, Python, SQL
Backend & Frameworks:	Node.js, Express.js, REST API Design, EJS, Appwrite BaaS, Django, Spring Boot
Frontend:	React.js, Redux Toolkit, React Hook Form, React Router, HTML, CSS, JavaScript (ES6+), TailwindCSS, Vite
Databases:	PostgreSQL, MySQL, MongoDB
Cloud & DevOps:	AWS, Docker, Git, Render, Vercel, MongoDB Atlas
Security:	JWT Authentication, Role-Based Access Control (RBAC), Route Guards
Core CS:	Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP
Developer Tools:	Postman, Figma

EXPERIENCE

Software Engineering Intern — Scramble Labs Technology Pvt. Ltd.

May 2025 – Aug 2025

- Scalable Backend Architecture:** Constructed and deployed 2 RESTful APIs using Python/Django and PostgreSQL, implementing strict request validation and query optimization for high-throughput service performance.
- Frontend Performance Optimization:** Developed 4 modular React.js + TypeScript components within a production Next.js application, reducing page load latency by 15% through React component caching and memoized render hooks.
- Git Workflow Optimization:** Established a standardized Git branching and code-review protocol across the engineering team, mitigating 15 potential merge conflicts and boosting team velocity.
- Quality Assurance & Testing:** Authored 15 automated unit and integration test suites for new REST APIs, expanding backend code coverage and preventing regression defects prior to production rollout.

PROJECTS

AssetFlow ERP — Enterprise Asset & Lifecycle Management Platform

PostgreSQL, Express.js, React.js, Node.js, Knex.js, REST API

[Code](#) | [Live Demo](#)

- Enterprise Asset Lifecycle Platform:** Architected an enterprise asset management platform for equipment tracking, checkout workflows, and maintenance requests with 4 granular role-based permission tiers.
- Relational Schema Optimization:** Formulated a PostgreSQL relational schema featuring 10+ normalized entities and targeted indexing, achieving a 3x speedup on complex query execution.
- Client-Side Caching & Sub-Second Loads:** Leveraged client-side caching (SWR) and asynchronous parallel API execution in React, delivering instant rendering across 9 dashboard sections.
- Audit Logging & Transaction Integrity:** Enforced transaction audit logging and payload validation across Express.js controllers using Knex.js query builder, maintaining full historical data integrity.

Typemate — Rich Text Editor with Smart Autocomplete

React.js, JavaScript, HTML, CSS

[Code](#) | [Live Demo](#)

- Selection & Range DOM API Engine:** Created an interactive document editing engine with 10+ formatting controls, live word and character count metrics, and custom undo/redo history using native Selection and Range APIs.
- Smart Predictive Auto-Suggest:** Spearheaded inline predictive text completion at word and sentence level, accelerating typing efficiency with real-time text completion logic.
- Keyboard & ARIA Accessibility:** Configured full keyboard accessibility across 20+ toolbar controls using semantic ARIA attributes, roving tab index navigation, and focus management.
- Draft Auto-Saving & State Persistence:** Applied local storage auto-saving mechanisms and streamlined React state updates, preserving user draft text across session reloads.

BlogSphere — Full-Stack Serverless Blogging Platform

React.js, Redux Toolkit, Appwrite BaaS, TailwindCSS, TinyMCE, React Hook Form

[Code](#) | [Live Demo](#)

- Serverless Backend Integration:** Integrated Appwrite BaaS for identity management, database operations, and cloud asset storage, eliminating custom backend server overhead for full-stack CRUD workflows.
- State Management & Protected Routing:** Deployed Redux Toolkit for centralized authentication state, paired with a custom route-guard wrapper component to protect create and edit routes from unauthenticated access.
- Form Validation & Image Optimization:** Engineered 3 validated form components using React Hook Form across 7+ fields, incorporating automated URL slug generation and client-side image compression.
- WYSIWYG Editor & Exception Handling:** Structured a content creation interface using TinyMCE, implementing granular error handlers across network and file upload states with responsive TailwindCSS layouts.

ACHIEVEMENTS & LEADERSHIP

- Data Structures & Algorithms:** Solved 240+ Data Structures & Algorithms problems on LeetCode (leetcode.com/u/Shresth_jaiswal).
- Community Leadership:** Appointed Core Member of Notion Community at VIT Bhopal, organizing tech talks, peer learning workshops, and cross-functional student initiatives.
- Professional Certifications:** Earned NPTEL Silver Elite Certification in Cloud Computing & Internet of Things (IoT).
